

## Joey Wills

### SUMMARY

IT professional with over 7.5 years of experience in the software development space. Joey has extensive experience with .NET and Typescript. Joey also has experience with backend technologies working with SQL, and Non-SQL databases. In addition, he has experience working with both Azure and AWS cloud technologies and has primarily worked in an Agile environment.

### SKILLS

- .NET
- Azure/Azure DevOps
- SQL
- TypeScript
- HTML/CSS
- Angular
- React
- REST
- AWS
- Agile

### PROFESSIONAL EXPERIENCE

#### BiBERK, Pittson, PA (Remote)

November 2023- Present

##### Software Developer

- Technologies Used: .NET C#, ASP.NET MVC, AureliaJS, SQL, Entity Framework, Azure, and Azure DevOps.
- Developed and delivered feature upgrades for customer-facing existing purchase platforms utilizing .NET C#, ASP.NET MVC, and AureliaJS.
- Built and maintained REST API endpoints integrated with SQL databases, modifying stored procedures and entity schemas, while utilizing Entity Framework.
- Partnered with the DevOps team in an Azure and Azure DevOps environment to deploy applications, manage ticketing workflows, and handle production support.
- Collaborated continuously to identify system performance drops and implemented targeted performance improvements.
- Authored extensive technical and process documentation from scratch, including guides for custom version control software.

#### LIQUIDDEVS, Lufkin, TX (Remote)

October 2021- November 2023

##### Software Developer

- Technologies Used: .NET C#, Angular, React, SQL, Entity Framework, AWS, ASP.NET MVC, and Jira.
- Delivered feature upgrades for customer-facing purchase platforms using .NET C#, ASP.NET MVC, and AureliaJS.
- Developed and maintained REST API endpoints backed by SQL databases, including modifying stored procedures, updating entity schemas, and utilizing Entity Framework.
- Collaborated with cross-functional teams in an Azure and Azure DevOps environment to manage deployment workflows, track ticketing, and handle production support.
- Monitored applications to identify system performance bottlenecks and implemented targeted performance improvements.
- Authored comprehensive technical documentation and internal process guides from scratch, including instructions for custom version control software.

#### CGI Federal, Lafayette, LA (Remote)

August 2019 – October 2021

##### Application Developer

- Technologies Used: Java, Springboot, Angular, SQL, and Jira
- Developed Angular UI features for asset management software used by 75+ government agencies to track and maintain 4.2 million client assets, with a value of over \$80 trillion.
- Enabled better management and utilization of multi-cloud environments by contributing new Angular code to a cloud hybrid orchestration platform project.
- Greatly enhanced usability by taking a mobile first approach to UI development.
- Worked directly with stake holders and product owners to deliver features most needed by end users.
- Utilized tools and principles such as Jira and Agile to collaborate with a team of 25+ application developers and software engineers.
- Helped convert an existing React project to a new Angular project to better match company's current tech stack.
- Connected microservice environment to Angular UI.

Joey Wills  
225.806.5574  
jdwills95@gmail.com

- Used unit testing tools such as Karma to ensure code quality.

**IBM, Baton Rouge, LA**

**February 2019 – August 2019**

**Application Development Specialist**

- Technologies Used: Java, Springboot, Angular, React, NodeJS, SQL, and IBM Cloud
- Coordinated with a small team to design full stack proof of work projects using technologies such as Angular, React, NodeJS, and SQL.
- Participated in over 6+ classes taught by IBM and ex-Intel employees from topics ranging from Garage Bootcamp and IBM's approach to Agile methodology.
- Earned over 10+ badges for topics such as Cognitive Practitioner, IBM Agile Explorer, and IBM Cloud Innovate Method Explorer.

**EDUCATION**

**Northwestern State University, Natchitoches, LA**

- Bachelor of Science in Computer and Information Systems
